'Reach, Teach and Impact' Architects and Specifiers to build greater Profits!

McGraw Hill Construction has created powerful Continuing Education opportunities that will elevate the profile of companies with expertise and products in the areas that represent significant growth from the 2009 Economic Stimulus package, including the Federal Government.

This course introduces architects to key programs that are driving the federal government's commitment to "greening government buildings," including the General Services Administration's (GSA) "Sustainable Design Program" and the Department of Energy's (DOE) Federal Energy Management Program (FEMP) which mandates a minimum equivalent of LEED's Silver rating.

Your company can be an integral part of this course!

Multi-sponsored Continuing Education Article Package includes:

- Inclusion in the course content by means of a quote from a qualified company representative
- Sponsors can submit images to be included in the presentation
- Product spotlight in online buyer's guide that links to sponsor's website or Sweets profile, separate from the course
- Exposure in continuing education promotional advertisement in *Architectural Record* and *GreenSource* in month of release
- Qualified Leads: Downloadable list of test-taker leads accessible 24/7.
- Sponsor Tracker: Access 24/7 to test taker activity & downloadable reports
- Test-taker project information available through the MHC Network Dashboard
- Add-on Option: Available to include a separate two-minute commercial message

Multi-sponsored Online Interactive Package Sponsorship . . \$7,490 (Gross)

As a sponsor, your products and services will come to life, in living color and with digital sound. Better yet, it's easy! McGraw-Hill Construction's CE team develops the course with you, handles all of the production, the internet hosting, the marketing and more!

"Everyone gets credit – the industry professionals who read it and the providers who delivering it!"
