INFORMATION TECHNOLOGY Point Clouds and 3D Modeling for the Masses
 By John Laeumie

(ENR) A longer tease description of the story to go here in the space provided no more than not too many lines but enough to draw people in and get them to click through to the full story. Just enough to tease the readers to the story. Short and sweet. A longer tease description of the story to go here in the space provided no more than not too many lines but enough to draw people in and get them to click through to the full story. Just enough to tease the readers to the story. Short and sweet.

...Using ENR's latest construction market intelligence, targeted for executives and decision-makers in the A/E/C business sectors. ENR's new TechConnect e-Newsletter is dedicated to helping the construction community to make the most of available technology, to increase operational effectiveness and to boost operational efficiency.

TechConnect is delivered to the Inboxes of over 20,000 C-level executives, twice monthly, with exclusive points-of-view, thought-leadership and insights into three main industry categories:

Information Technology

- Project Management
- Lifecycle
- Virtual Jobsites
- App Reviews

Construction Technology

- Cloud Computing
- GPS on-the-Job
- RFID on Machines
- Geo-Targeting

Technology/BIM

- Open Source
- Modelling
- How-to's and Software Reviews
- Best Practices with BIM Tools and more!

Get in on the Spec. Sponsor TechConnect.

Space in the TechConnect e-Newsletter, which launches in June, will be prioritized based upon booked ad revenues for 2011, and space is limited to only six (6) sponsors.
